2011 Dog Friendly Fun Runs & Events

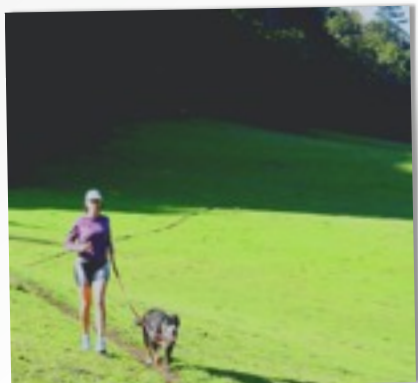

Studies show that people who own dogs are much more likely to get started on an exercise program.

The even better news and the big surprise to researchers.... studies

also show that people who started an exercise program with their dog show big improvement while those who started similar programs without dogs began making excuses and showing little improvement.

Find an event near you and put in on your calendar. If you need a training plan find it here: [5K Training Guide Running with Dogs.](#)
